

FIX-N-FAX #93

CALIFORNIA DEPARTMENT OF FORESTRY AND FIRE PROTECTION

No. 93

Equipment Standard

Mandatory Compliance

Date: February 1984

Operational Safety Devices (Vehicle with Dump Bodies)

California Administrative Code - Title 8, Section 1595 Construction Safety Orders:

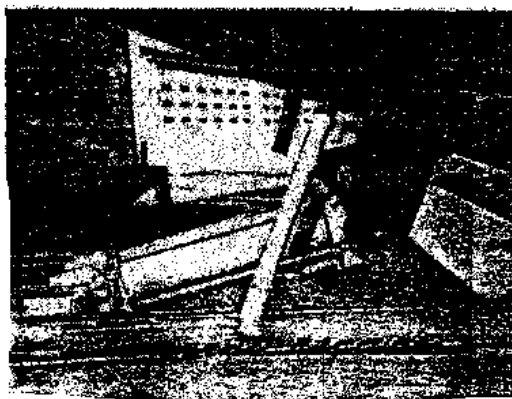

- (b) Trucks with dump bodies shall be equipped with positive means of support, permanently attached, and capable of being locked in position to prevent accidental lowering of the body while maintenance or inspection work is being done. In all cases where the body is raised for any work, the locking device shall be used.

Illustrated below is a typical installation. This device may either be manufactured locally or purchased from a body manufacturer.

This Fix-N-Fax applies to all vehicles which have a dump body, including light transports and tilt-bed trailers.

CAUTION:

Do not weld or drill in/on vehicle main frame. Consult with a Forestry Equipment Manager for installation instructions.
